

EverEdge garden rings are pre-rolled for ease of installation. Long lasting and maintenance free, these rings will save countless hours of tedious edging.

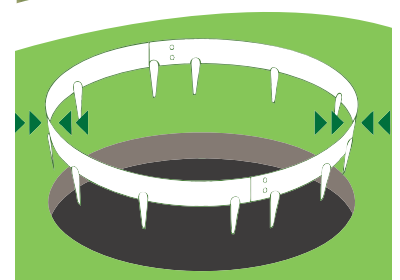

A ring is made up of either two or three pre-rolled 1 metre x 1.6mm pieces, creating either a 600, 900, 1,200 or 1,500mm diameter ring. Installation is quick and simple. With concave teeth, and by being bolted together, the rings are held securely in the ground. The rings can easily take the weight of a ride-on tractor lawn mower.

EverEdge Garden Rings are available in depths of 75 or 125mm.

Heavy Duty rings in 4mm are available to order. We also custom make heavy duty rings to any size (see Custom Edging page). Please ask for details.

Typical Usage

- Trees
- Shrubs
- Statues
- Ornaments
- Manholes

Diameter (mm)	Brown		Slate	
	75mm	125mm	75mm	125mm
