

**Classic**

Available in 1 metre lengths, 1.6 or 2.5mm thickness and 75, 100, 125 depths. Very flexible, and used around flower and vegetable beds, and domestic paths. Will withstand a ride-on mower. 2.5mm is recommended for use on driveways.

**ProEdge**

2.5 metres long, 2.5mm thick and comes in 75, 100, 125 and 150mm heights. The professional's choice for longer lawns, paths, driveways, avenues, and parks. Used against stone, asphalt and resin bonded surfaces.

**Titan**

A commercial range of 2.5 metre long edging but where a deeper and thicker edging is required. Depths from 150 – 300mm, and in 2.5, 4, and 6mm thicknesses.

**Halestem**

Halestem has been specifically designed by EverEdge where an L-shaped edging is required up against tarmac, resin bonded surfaces or paving.

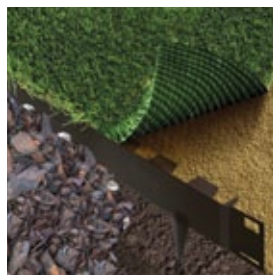

**Garden Rings**

Pre – rolled 1.6mm edging for 600, 900, 1,200 and 1,500mm diameter circles. Comes in sections and bolted together for quick and easy installation. Also available in 4mm for commercial applications.

**Planters**

Square, circular or rectangular steel planters built to order. Available in a range of steels including Corten®.

**Atlas**

EverEdge Atlas is a variation of our EverEdge Classic that comes in 1 metre lengths, made in 1.6mm thick galvanised steel with a heavy duty brown coating.

**Custom**

A complete bespoke service to manufacture an edging to your specification.
