

The permanent solution for low cost easy maintenance of lawns, paths, drives, flower and vegetable beds.

Supplied in one metre lengths in a choice of 3 (interconnecting) heights, 75, 100 and 125mm (3", 4" and 5") with a thickness of 1.6mm. The spike length is 94mm on all sizes. We also supply a 150mm height option - This doesn't connect to any of the other classic range, just itself. For longer lengths see EverEdge ProEdge.

The edging is quick and easy to install using a wooden/rubber/plastic mallet. The sections overlap by 6% and interlock. This edging is very flexible, and is curved on site to any radius or bent easily to any angle. Install the top of the edging to soil level. No extra parts are required.

EverEdge Classic is strong enough to take a ride-on mower or light vehicle. Anything heavier use ProEdge edging alongside driveways or areas of heavier use.

Sold in packs of five 1 metre lengths, EverEdge Classic comes galvanised and powder coated dark brown as standard, unless otherwise stated.

Code	Length (mm)	Thickness (mm)	Depth (mm)
A1	1000	1.6	75
B1	1000	1.6	100
C1	1000	1.6	125
D1	1000	1.6	150

Sold in packs of 5 lengths.

EverEdge Classic overlaps and interlocks, please remember to add 6% to your actual linear requirement.

Galvanising Specification

EverEdge Classic is manufactured to BSEN 10346-2009 with an average 20 micron zinc coating.

Typical Usage

- Lawn edges
- Flower borders
- Paths
