

EasyBed is a quick and easy self-assembly raised bed kit.

The EverEdge EasyBed is galvanised and powder coated for durability. Each panel is approximately 980mm long, 200mm high, and 2mm thick. EasyBed has a rolled rim for further strength. The hinged corner/linkage system is held with 10mm diameter pins which also hold the bed in place (can be cut if beds are installed on a hard surface).

The hinged corners allow for a variety of different shaped beds to be built.

If required, each kit can be supplied with a flexible plastic netting frame (net not included) that sits neatly in the hinge system.

Kit Type	Colour
980mm x 980mm	Brown
1,960mm x 980mm	Brown
2,940mm x 980mm	Brown
3,920mm x 980mm	Brown
